10/26 Parish Issues

(i) Update on Riverbank

Councillor Sharp give an update on the landslip at the rear of the Mitford allotment. Black poplar has been planted behind the willow. It is a native tree, likes damp conditions and has an aggressive root system. Tree hinging is about to take place which should direct the current away from the erosion site.

Councillor Sharp has been in touch with Eco North again to get a quotation for design and management of permits for a willow spiling scheme behind the allotment. Councillor Sharp has also contacted a specialist at the Environmental Agency who deals with nature-based remediation for erosion, and has asked him apart from Eco North, what other companies in the northeast have a speciality in willow spiling.

At this time, there is no idea of the total costs but probably looking at £15,000 to £20,000 for the design, permitting and management of the river and there should be a provision of £25,000, implementing in the next three to four years. Grant funding will also be sought.

RESOLVED

To transfer £3000 from the Warm Hub earmarked reserve and £2000 from the general reserve to Riverbank Remediation earmarked reserve.
